Applicant's election with traverse of Group II, claims 47-64, in the reply filed on March 20, 2006 is acknowledged. The traversal is on the grounds that since both groups are classified in Class 210, a *prima facie* case of serious burden has not been established. This is not found persuasive because the searches for the individual Groups are clearly divergent, as explained in the previous Office Action, and the additional search required for the non-elected invention of Group I would constitute a serious burden upon the examiner.

The requirement is still deemed proper. Claims 1-46 are withdrawn from further consideration, as being directed to a non-elected invention.

Applicant's election of the following species is also acknowledged:

- (1) Electrical energy species = traveling electric field;
- (2) Electrode species = metal;
- (3) Adsorbent species = X-type zeolite;
- (4) Binder species = smectite clay; and
- (5) Adsorbed substance species = oxygen.

Upon further consideration, an additional election of species is now required.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- (6) Thermal reaction species (i.e. non-thermal, exothermic, endothermic).

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed thermal reaction species for prosecution on the merits to which the claims shall be restricted if

Art Unit: 1724

no generic claim is finally held to be allowable. Currently, claims 47-55 and 59-64 appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR § 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. See M.P.E.P. § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.
